

Instructions

1. Print off page two of this doc.
2. Roughly cut out the building shapes but trim the end of the buildings close and square.
3. Cut off the left part of the clock town where it is shown by the arrows.
4. Take a strip of card approximately 19 cm x 10 cm (8.5" x 4") and score a line about 2.5cm (1") from the edge (about the width of one face of the clock tower).
5. Fold along the score line.
6. Glue the combined clock tower and three buildings piece so that the corner of the clock tower lines up with the folded card.
7. Trim off any excess card along the left (clock tower) and right (street end) edges.
8. Glue the separate three building piece to the rear making sure to line up the street end edge.
9. Glue the separate clock tower piece to the back of the existing clock town. Being on the internal fold there will be a little overhang to trim off.
10. When the glue is dry trim off any excess card and cut along the roofline.
11. Cut and affix a support tab (not shown on page two – you'll need to do that on your own) for extra support.

Cut
